

**The Peed Company, Inc.**  
*"Growing Excellence"*

# BLUEBERRY FERTIGATION

With over 25 years of experience, The Peed Company, Inc. is the premier partner in nutrient and chemical application. Application through high quality H.E. Anderson injection systems and using current scientific practices that ensure precise amounts of nutrients and other amendments are provided, promotes quality growth and plant health. Fertilizers, sanitizers, fungicides and many other liquid or water-soluble solutions are applied exclusively through injections to create an immediately available product the plant can take up. Working alongside the grower, our mission is to achieve and maintain a common goal of producing a maximum crop yield on a consistent basis.

Let The Peed Company, Inc. help you *"Grow Excellence"* today.

## Testimonials

*"The Peed Company is the kind of company you want to do business with! They have worked hard to gain a lot of experience and knowledge of the blueberry industry over the years."* Alex Cornelius, Cornelius Farms, Manor, GA

*"Since injecting with The Peed Company, my crop has been delivered on time every year. They are always learning and bringing new ideas to help me succeed. They are truthful and have never sold me anything I did not need. That is why I continue to work with The Peed Company."*  
–George Hughes, Hughes Berries Co., Homerville, GA

*"The Peed Company is more than just a service provider. These guys really care about the success of your farm. From fertigation installation to consulting, they really are a great company to partner with. We are grateful to have them as part of our team!"*  
–Michael Thomas, Thomas Family Farms, Blackshear, GA

*"The Peed Company is a good company to work with. Their injection equipment is a quality product that is consistent and accurate. They always have us ready for the growing season, then help us prepare our equipment for the off-season too. They are always there when we need them!"*  
–Johnny Allen, Allen Farms, Alma, GA
